25 April 1980

I feel our session went extremely well yesterday; and unless something unforeseen occurs, we should meet our deadline. Of course, we will have to wait on Dr. Osdene to execute the application upon his return from Europe, but that will not cause a problem from our standpoint.

We all appreciate your fine effort in completing the application so promptly. John Torrente's effort and contributions are also acknowledged and appreciated.

Unless directed otherwise by Drs. Osdene, Seligman or Gannon, I will begin to collect information and prepare appropriate examples for an application directed to the non-tobacco materials and product. I will keep you informed as to the progress being made towards this particular effort.

If you require additional information regarding the inventors, please advise. You may wish to advise us regarding data that would be useful for incorporation in a continuation-in-part of the original application. If there are potential weak points that could be enhanced by additional analytical data, I feel certain it can be generated after filing of the application in the USPTO.

Very truly yours,

Susan A. Hutcheson
